Dr. Emanuel Savianu · savianu.it
Studio Medico Ippocrate · Piazza Saione 3, Arezzo · Reception: 0575 910 904

How your doctor's office works

Book by yourself in 1 minute on Doctolib. Use the phone only for real emergencies.

BOOK AND WRITE ON DOCTOLIB

SCAN HERE

- **Book the visit yourself:** choose the day and time on the Doctolib app or on the website.
- **Repeat prescriptions:** send a request on Doctolib (ready in about 2 working days; collect them at the pharmacy with your health card).
- **Office hours (by appointment only):** Mon–Fri 09:30–12:30 and 16:00–19:00.

Scan the code with your camera or go to: prenota.savianu.it

Reception: 0575 910 904

CALL ONLY IF: you cannot use Doctolib · you have an urgent problem today · you cannot leave home (call in the morning **09:30–10:30** for a home visit). Do not call for repeat prescriptions.

INPS Certificate and Visits

For a sickness certificate **the visit at the office on the first day is compulsory** (the law forbids doing it by phone). At every visit **bring the boxes of all the medicines you take**.

IF YOU FEEL UNWELL: WHO TO CALL AND WHEN

Pharmacy and CUP Toscana
800 575 575

Ask for advice at the pharmacy for minor problems (cold, mild cough). Call the free CUP number or go to the pharmacy to book tests and specialist visits with your referral.

Out-of-hours doctor (24h)
116 117

Works at **night, on Saturday, Sunday and public holidays**, or when your doctor is away. Free number for urgent but not life-threatening problems (it also issues sickness certificates on public holidays).

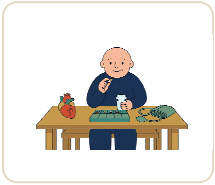

Serious emergency
112

Only for danger to life: severe chest pain, difficulty breathing, fainting, sudden paralysis, accident or heavy bleeding. Do not go to the Emergency Room for minor problems.

The Family Doctor (GP) is free of charge and bound by professional secrecy. Turn the sheet over for advice on medicines and health.

Live well and use medicines safely

1. SAFE USE OF MEDICINES AND PREVENTION

Medicines every day

High blood pressure, diabetes or cholesterol: take your medicines every day even if you feel well. Never stop them on your own.

Antibiotics

Take them only if the doctor prescribes them (they do not work for viruses, colds or flu). Always finish the whole box.

Herbs and traditional remedies

Always tell your doctor if you use herbal teas, herbs, supplements or traditional medicines: they can change the effect of your medicines.

Free vaccines and screening

They protect you and your family from serious diseases. Ask the doctor which vaccines and free check-ups are right for you.

2. FOOD AND DAILY MOVEMENT

A healthy plate every day

Eat more green leafy vegetables, pulses (lentils, chickpeas) and wholegrains. Cut down on white rice, white bread, fried food and sweets.

Less salt, more spices

Too much salt raises blood pressure. Use spices, garlic, lemon and natural herbs to flavour your food.

Drink plain water

Drink 1.5–2 litres of water a day. Avoid fizzy drinks, sweetened tea and packaged fruit juices (they contain a lot of sugar).

Move for 30 minutes a day

Walk briskly every day: it lowers blood sugar, regulates blood pressure, controls weight and reduces stress.

3. MIND WELLBEING AND REST

Your mind needs care too

Sadness, anxiety or deep tiredness are not your fault. If you can no longer do your usual things, talk to your doctor without fear.

Sleep 7–8 hours and keep a routine

Sleep repairs mind and body. Keep regular hours, turn off phone screens before bed and get some fresh air every day.

Serious emergency: 112 · Out-of-hours doctor (night and holidays): 116 117 · Listening (Telefono Amico): 02 2327 2327
